READY TO CULTIVATE YOUR FUTURE? NEWMAN UNIVERSITY'S AGRIBUSINESS PROGRAM DELIVERS!

Unlock Opportunities in Southwest Kansas with a Bachelor of Science in Agribusiness!

Sow the seeds of your successful future with Newman University's newly introduced Bachelor of Science in Agribusiness. Responding to the high demand for specialized agribusiness education, our program is tailored to fit the needs of transfer students like you.

DESIGNED to prepare students for the ever-evolving, technology-driven agribusiness landscape, ensuring you are equipped with the necessary skills and knowledge to succeed in this field.

WHAT SETS OUR PROGRAM APART is a commitment to providing a quality private four-year education experience at an affordable price to benefit students who want to stay local in Southwest Kansas to learn.

PROGRAM HIGHLIGHTS

Significant real-world work experience prior to graduation. This practical training allows our students to gain invaluable insights and apply their knowledge in a professional setting, enhancing their employability upon graduation.

Strong understanding of fundamental business and agribusiness concepts, theories, and practices. Students will also gain competency in business data analysis processes and practices, an essential skill in today's data-driven world.

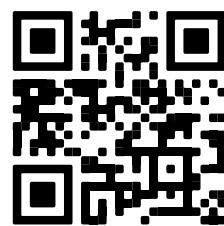

Ability to analyze ethical problems in agribusiness drawing from philosophical ethics and Catholic traditions. Ethical decision-making is crucial in the agribusiness sector, and our graduates will be well-prepared to navigate complex ethical challenges they may encounter.

Learn professionalism in all forms of communication. Our students will develop strong interpersonal and group communication skills, ensuring they can effectively collaborate and engage with colleagues, clients, and stakeholders.

Students will have the opportunity to specialize in areas that are highly sought after by regional employers - including Business Management with an emphasis on Agricultural Products, Data Analytics, and Agricultural Ethics and Sustainability. By acquiring these specialized skills, our graduates will open the gates to prosperous careers in agribusiness management and agricultural analytics.
